Working with an agent safely: review

AI agents · Lower secondary · Unit check

In this unit

- Inside an agent
- Check what it did
- Ask before it acts
- Your data, your bundle

The big ideas

- An agent is a model in a loop with tools; the app runs them
- Check the call against your words: sure isn’t right
- Read, then say yes; the app checks the yes in code
- Cloud agents cost data, money and privacy

Agent safety poster

1. Warm-up (3 min): One habit from each lesson.
2. Plan (7 min): Four boxes, one per lesson.
3. Make (7 min): Draw and write your poster.
4. Share (3 min): Explain your most useful box.

Paper and pens are enough. Use only made-up names in your examples.

Let’s discuss

1. Which habit from this unit will you keep?
2. What surprised you most about how agents make mistakes?
3. How would you explain asking first to a younger student?

Exit ticket

- My most useful habit from this unit, and when I’ll use it.
