Review plan · for the teacher

AI basics: unit check

AI · Level 1 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Spot the AI around you
- How machines learn from examples
- Good data, fair AI
- Check before you trust

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which idea will you use first?
- Which question surprised you, and why?
- What will you tell your family about this unit?

Exit ticket

- One idea I will use, and when I will use it

Try it in class tomorrow

Pick the habit from this unit your pupils need most, teach it this week, and tell a colleague how it went.

Quiz sheet · for each team

AI basics: unit check

AI · Level 1 · Unit check

Team _____ Date _____

1 **Which of these is most likely to use AI?**

◯ A calculator ◯ A solar lamp on a 6 pm timer ◯ Voice typing on a phone
◯ A school bell that rings at 7:30

2 **If a machine works by itself, it must be AI.**

◯ True ◯ False

3 **Put the steps of machine learning in order.**

☐ Label them
☐ Use: make predictions
☐ Test on new examples
☐ Collect examples
☐ Train: find patterns

4 **Match each word to its meaning.**

Training data	The stored patterns that training produces
Label	The examples a system learns from
Model	The system's best guess — it can be wrong
Prediction	The answer given to an example, like "spam"

5 **Why do we test a model on examples it has never seen?**

◯ To make the model run faster ◯ To teach it new words ◯ Because old examples are deleted
◯ To check it learned the pattern, not just the examples

6 **Which of these can make an AI tool fairer?**

☐ Test it with different groups of people ☐ Collect examples from the people who will use it
☐ Only test it with the people who built it ☐ Use fewer examples so it runs faster
☐ Let people report its mistakes

7 **If a chatbot sounds confident, its answer is probably correct.**

◯ True ◯ False

8 **Complete the habit.**

Ask clearly, _____ important facts in a _____ source, then _____ what to use.

Word bank: skip · random · check · decide · trusted

9 **Which of these should never go into an AI tool?**

◯ Your own draft lesson outline, with no names ◯ A question about how plants make food
◯ A request for quiz ideas on fractions ◯ Pupils' names, marks and phone numbers

Answers · for the teacher

AI basics: unit check

AI · Level 1 · Unit check

1 **Voice typing on a phone**

Voice typing learned from many recordings of people speaking.

2 **False**

Automatic is not the same as AI. Many machines only follow fixed steps a person set; most AI learns patterns from examples.

3 **Top to bottom: 2, 5, 4, 1, 3**

Examples and labels come first; testing on new examples shows whether the model really learned the pattern.

4 **Training data — The examples a system learns from**
Label — The answer given to an example, like "spam"
Model — The stored patterns that training produces
Prediction — The system's best guess — it can be wrong

These four words describe every machine-learning tool, from spam filters to crop apps.

5 **To check it learned the pattern, not just the examples**

New examples show whether the model learned a pattern that works on cases nobody showed it, or only memorised its training examples.

6 **Collect examples from the people who will use it; Test it with different groups of people; Let people report its mistakes**

Examples collected from the people it will serve teach it about them, testing with different groups shows who it works worse for, and people's reports show where the examples have gaps.

7 **False**

Chatbots predict likely words, so they can sound sure and still be wrong.

8 **Ask clearly, check important facts in a trusted source, then decide what to use.**

Ask, check, decide — you stay in charge of what reaches your pupils.

9 **Pupils' names, marks and phone numbers**

Names, marks and phone numbers are pupils' personal details: once typed into an AI tool, they leave the school's control.
