Review plan · for the teacher

AI tools for teaching: unit check

AI · Level 2 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- How a chatbot writes
- Prompts that fit your class
- Generate, then check
- Keep pupils' data private

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which idea will you use first?
- Which question surprised you, and why?
- What will you tell your family about this unit?

Exit ticket

- One idea I will use, and when I will use it

Try it at school tomorrow

Pick the habit from this unit you need most (a prompt with context, the four checks, or taking names out), use it this week, and tell a colleague how it went.

Quiz sheet · for each team

AI tools for teaching: unit check

AI · Level 2 · Unit check

Team _____ Date _____

1 **How does a chatbot write its reply?**

◯ It looks each fact up in a database ◯ It follows a rule a programmer wrote for each answer
◯ It picks one likely token at a time ◯ It copies the best web page it finds

2 **A chatbot with no web search knows about events from last week.**

◯ True ◯ False

3 **Which of these are true about tokens? Choose all that apply.**

☐ Every word is exactly one token ☐ More tokens can mean slower answers and higher costs
☐ The same message in Arabic often needs more tokens than in English
☐ A long or rare word can be several tokens

4 **Match each ingredient to its part of the prompt.**

Role	• • • •	"Write a ten-minute starter on old trade routes."
Task	• • • •	"You are a Form 1 history teacher in Tanzania."
Context	• • • •	"Three steps, each under 20 words."
Format	• • • •	"70 pupils, no textbooks, many speak Kiswahili at home."

5 **A chatbot's lesson uses examples from a city supermarket, but your pupils live in a farming village. What's the best next step?**

◯ Add "please make it better" ◯ Follow up: "Use examples from a farming village." ◯ Ask the same prompt again

6 **Put the steps in order: using AI for report comments safely.**

☐ Check and edit each draft comment
☐ Replace names with Pupil A, B, C, keeping the key on paper
☐ Copy the final comments onto the report cards under the real names
☐ Ask for comments, giving marks but no other clues

7 **Telling a chatbot to answer only from a textbook page guarantees a correct answer.**

◯ True ◯ False

8 **An AI wrote a story for your Primary 2 reading lesson. Which checks should you do before using it? Choose all that apply.**

☐ Do the names, foods and places fit your pupils' lives? ☐ Who is in the story, and who is left out?
☐ Did the AI sound confident? ☐ Are the facts in it true? ☐ Are the words right for seven-year-olds?

9 **Complete the habit.**

Share the _____, never the _____: before you ask, take out names and anything else that _____ to one child.

Word bank: points · task · password · listens · child

10 **You switch off "use my chats for training" in a tool's settings. Can you now type pupils' personal data?**

◯ Yes: with training off, nothing is kept ◯ Yes, if you delete the chat afterwards
◯ No: it is still sent and stored, so leave it out

Answers · for the teacher

AI tools for teaching: unit check

AI · Level 2 · Unit check

1 **It picks one likely token at a time**

A language model predicts: it scores the possible next tokens, picks a likely one and repeats.

2 **False**

Its knowledge stops at its cut-off, the date its training text ends.

3 **A long or rare word can be several tokens; The same message in Arabic often needs more tokens than in English; More tokens can mean slower answers and higher costs**

Tokens are pieces, not whole words: long or rare words split into several.

4 **Role — "You are a Form 1 history teacher in Tanzania."**
Task — "Write a ten-minute starter on old trade routes."
Context — "70 pupils, no textbooks, many speak Kiswahili at home."
Format — "Three steps, each under 20 words."

A role sets whose view to take, the task says what to make, context gives what only you know, and the format sets how the answer looks.

5 **Follow up: "Use examples from a farming village."**

A follow-up gives the missing context and keeps the rest of the lesson.

6 **Top to bottom: 3, 1, 4, 2**

The names come out before anything is typed, and the AI only ever sees Pupil A, B, C and the marks.

7 **False**

Grounding makes mistakes rarer and easier to spot, but the AI can still misread the page or mix in other things, and the page itself may be wrong.

8 **Are the facts in it true?; Are the words right for seven-year-olds?; Who is in the story, and who is left out?; Do the names, foods and places fit your pupils' lives?**

Facts, level, bias and local fit: all four checks apply to a story too.

9 **Share the task, never the child: before you ask, take out names and anything else that points to one child.**

The AI can help with the task without knowing the child.

10 **No: it is still sent and stored, so leave it out**

The setting helps, but your words still travel to the company and may be stored for a while.
