Lesson plan · for the teacher

# Your school's AI policy

AI · Level 4 · Lesson 2

**Time**
40 min

**Materials**
Strips of paper or exercise-book pages for each group; Board and chalk; A large sheet of paper for the final charter

## Learning goals

- Suggest rules for using AI in our class, with a reason for each.
- Agree five rules together and vote on the wording.
- Explain how our rules keep learning honest and people safe.

## Activity: Our class AI charter

1. Warm-up (5 min): Ask: when could AI help you learn, and when would it stop you learning? Write two or three answers on each side of the board.
2. Groups (12 min): In groups of four to six, pupils write three rules for using AI in class on strips of paper, each with a reason. Suggest areas if they get stuck: when it helps, when it isn't allowed, saying how you used it, what never to share.
3. Gather (8 min): Each group reads its rules aloud. Stick or write them on the board, putting similar rules together, and cross out repeats.
4. Vote (10 min): Agree the five most important rules. For each one, offer two wordings and let the class vote with a show of hands for the clearest.
5. Wrap-up (5 min): Copy the five rules onto a large sheet titled "Our class AI charter", add a review date, and let everyone initial it. Then give the exit ticket.

**Keep the charter to five rules in pupils' own words, each with a reason. Make sure one rule covers privacy (no names, photos or marks in AI tools) and one covers saying how you used AI. Put a review date on it.**

## Discussion

- Which of our rules will be hardest to keep, and why?
- What should happen when someone breaks a rule, and who decides?
- What would make us change a rule next term?

## Exit ticket

- The rule in our charter that matters most to you, and why.

**Try it at school tomorrow**
Make a "Class AI charter": In groups, pupils write rules for using AI in your class — when it helps, when it isn't allowed, how to say you used it, and what never to share. Gather the ideas on the board, agree five rules, and let the class vote on the wording. Put the charter on the wall and review it at the end of term.

Practice questions · for you

# Your school's AI policy

AI · Level 4 · Lesson 2

**1** **Mr Okafor scored three reading apps first, then chose weights that made his favourite win. Is that a fair decision?**

◯ Yes — the sums are correct ◯ No — the weights should be agreed first

◯ Yes, as long as he publishes the scores

**2** **Match each principle to what it looks like in school.**

| | | |
|---|---|---|
| People stay responsible | • • • • | Pupils' names and marks never go into public AI tools |
| Privacy | • • • • | AI tasks are done in class, so pupils without phones take part |
| Openness | • • • • | A teacher checks every AI-made worksheet before it is used |
| Equal access | • • • • | Pupils add a note saying how they used AI |

**3** **Put the steps for writing a school AI policy in order.**

☐ Pupils and parents give their views

☐ A few staff draft one page of principles

☐ Review it every year

☐ The school agrees and publishes the policy

**4** **For pupils old enough to use AI tools, clear rules taught openly usually protect them better than banning every tool.**

◯ True ◯ False

✎ **Which principle matters most in your school right now, and who should help to write it?**

Check your answers

# Your school's AI policy

AI · Level 4 · Lesson 2

**1** **No — the weights should be agreed first**

The arithmetic can be perfect and the choice still unfair: weights picked after scoring can make any favourite win.

**2** **People stay responsible — A teacher checks every AI-made worksheet before it is used**
**Privacy — Pupils' names and marks never go into public AI tools**
**Openness — Pupils add a note saying how they used AI**
**Equal access — AI tasks are done in class, so pupils without phones take part**

Each principle shows as one habit people can check: a teacher checks AI's work (responsibility), names and marks stay out (privacy), pupils say how AI helped (openness), and AI work happens where everyone can join in (equal access).

**3** **Top to bottom: 2, 1, 4, 3**

A short draft gives people something to react to; their views come before anything is agreed; and a yearly review keeps the policy in step with new tools and needs.

**4** **True**

A ban can't be checked at home, so pupils with phones still use AI — out of sight and without guidance — while others never learn to use it well.
