Review plan · for the teacher

Leading AI at school: unit check

AI · Level 4 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Audit an AI tool
- Your school's AI policy
- Assessment when pupils have AI
- Design an AI-supported unit

Activity: Team quiz

1. Make teams of three or four colleagues
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Note the question that caused most debate, for your next staff meeting

Discussion

- Which idea will you use first in your school?
- Which question caused the most debate, and why?
- Who else in your school should see this unit?

Exit ticket

- One step I will take this month, and who I will take it with

Try it at school tomorrow

Pick one step from this unit — an audit, a policy principle, a redesigned task or a unit plan — share it with a colleague this week, and agree a date to look at the results together.

Quiz sheet · for each team

Leading AI at school: unit check

AI · Level 4 · Unit check

Team _____ Date _____

1 **You plan to audit a reading app that sends pupils' recordings to the supplier. What must you know before any pupil reads into it?**

- ◯ Its overall accuracy score, and how it was measured
- ◯ Where the recordings go, and who can use them
- ◯ Whether other schools in the district like it

2 **A detector score of 90% AI proves that a pupil used AI.**

◯ True ◯ False

3 **Put the steps of a small tool audit in order.**

- ☐ Count the tool's errors for each group
- ☐ Decide: adopt, pilot or refuse
- ☐ Collect about twenty real samples from each group
- ☐ Choose the groups to compare
- ☐ A teacher and the tool mark the same samples

4 **Match each policy principle to what it means.**

Purpose	• • • •	A person checks and decides, never AI alone
People stay responsible	• • • •	No pupil loses out for having no phone or data
Openness	• • • •	AI is used only when it helps learning
Equal access	• • • •	Staff and pupils say when AI helped

5 **A committee is choosing a tool with a weighted decision matrix. When should it agree the weights?**

◯ Before any tool is scored ◯ After scoring, to fit the best tool ◯ Only if two tools tie

6 **A pupil's essay is flagged as AI-written. Which are fair next steps? Choose all that apply.**

- ☐ Ask her to explain a paragraph
- ☐ Try more detectors until one agrees
- ☐ Give a zero straight away
- ☐ Ask her to redo a short part in class
- ☐ Look at her notes and drafts

7 **Mr Okafor plans a unit on electricity. A third of his class has no phone at home. Which plan for the lab reports is best?**

- ◯ Pupils with phones get AI feedback at home; the others get your feedback in class
- ◯ Pupils write them at home, and you check each one with a detector
- ◯ Pupils write them in class; groups use one phone for feedback on their own drafts

8 **Principles, not a list of approved apps, should be the core of a school AI policy.**

◯ True ◯ False

9 **Complete the sentence.**

Give each task an AI-use _____, and ask pupils to add a short _____: which tool, what they asked and what they changed.

Word bank: note · penalty · ban · level

10 **In a unit on writing arguments, which use of AI keeps the learning with the pupil?**

- ◯ AI chooses which side the pupil argues
- ◯ AI comments on the pupil's own finished draft
- ◯ AI writes a first draft for the pupil to edit

Answers · for the teacher

Leading AI at school: unit check

AI · Level 4 · Unit check

1 **Where the recordings go, and who can use them**

An audit must not cost pupils their privacy.

2 **False**

Detectors guess from patterns such as simple wording, and studies have found they wrongly flag second-language writers more often.

3 **Top to bottom: 4, 5, 2, 1, 3**

You can't collect samples until you know which groups to compare, and you can't count errors until a teacher has marked the same work as the tool.

4 **Purpose — AI is used only when it helps learning**
People stay responsible — A person checks and decides, never AI alone
Openness — Staff and pupils say when AI helped
Equal access — No pupil loses out for having no phone or data

Each principle answers a different question: why use AI, who is responsible, how honest we are about it, and whether every pupil can take part.

5 **Before any tool is scored**

Weights express what matters, so they are agreed first and in the open.

6 **Ask her to explain a paragraph; Look at her notes and drafts; Ask her to redo a short part in class**

Explaining, showing drafts and redoing a short part in class all help show whether the work is hers.

7 **Pupils write them in class; groups use one phone for feedback on their own drafts**

Writing the report is the learning, so pupils write it themselves, in class, where you can see it; AI comes in afterwards for feedback, on one phone per group, so pupils without phones get the same help.

8 **True**

Apps change every few months, so a list goes out of date almost at once.

9 **Give each task an AI-use level, and ask pupils to add a short note: which tool, what they asked and what they changed.**

The level tells pupils how much AI the task allows, and the note makes saying how they used it a normal, honest part of the work.

10 **AI comments on the pupil's own finished draft**

Building the argument is the learning, so the pupil does it first.
