Loss, descent and backprop

University, 2

The step

- Loss is large when wrong
- Step against the slope
- Backprop passes the blame back

The rate

- Too small crawls
- Too big climbs out

In the lab

1. Run Good
2. Run Too big

Ask

1. Where does the gradient point?

Exit ticket

- θ^2 at 3, rate 0.1: write the next θ.
