# Sequences and the memory that fades

University, 3

# One symbol at a time

- The state is the memory
- Empty steps still multiply it

# The fade

- Small memory, cue gone
- Large memory, cue remains
- The blame fades too: the vanishing gradient

# In the lab

1. Slider to the left
2. Slider to the right

# Ask

1. What would a longer gap do?

# Exit ticket

- Does the end still know the cue? Write the number.
