Who a detector misses

University, vision 2

One block

- Filters, then ReLU, then pooling
- Each part throws detail away

The miss

- Trained on close-set eyes
- One line for every picture
- A wider face falls just under it

In the lab

1. Read the close-set score
2. Read the wide score
3. Read the box

Ask

1. Why is the training shape not a test?

Exit ticket

- Name the group the detector missed.
