Lesson notes · for you

Check the facts

AI · Level 2 · Lesson 3

Time
25 min

Materials
An AI answer or a forwarded message with facts in it; Your textbook; A notebook and pen; A phone with the Darsi app (for the lab)

Learning goals

- Explain hallucinations: invented facts, numbers, quotes and sources.
- Check a claim against two trusted sources.
- Check photos, videos and voices before you share them.

Activity: Fact detectives

1. Warm-up (3 min): Read three claims about a topic in your textbook; one is invented. Each person guesses which, and says what made them suspicious.
2. Spot the risky bits (5 min): In a short AI-style answer, underline every number, date, name, quote and source: these are the claims to check first.
3. Check (10 min): In pairs, check three of the underlined claims in the textbook or with a teacher. Mark each one held up, wrong, or couldn't find it, and note where you checked.
4. Share or not? (4 min): Look at a forwarded photo of a dramatic event. Ask the three questions: who made it, where is the original, and do trusted sources report it? Then decide: share, or don't.
5. Wrap-up (3 min): Each person writes a three-step habit for checking AI answers and forwarded messages, to keep in the front of their notebook.

For a revision group or at home. Prepare a short AI-style answer on a topic from your textbook with one wrong date and one invented source in it, three claims for the warm-up, and a forwarded photo (printed or described).

Discussion

- Why doesn't asking the chatbot "Are you sure?" count as checking?
- Which sources do you trust, and why?
- What would you do if a relative forwards a video you think is fake?

Check yourself

- Write the three questions you'll ask before you share a photo or video.

Try it this week
Take an AI answer, or a message forwarded in your family group. Pick three facts from it and check each one in your textbook or with a teacher. How many held up? If one didn't, tell the person who sent it, kindly.

Worksheet

Check the facts

AI · Level 2 · Lesson 3

Name _____ Class _____ Date _____

1 **A shocking video of a famous person lands in your class group. What do you do first?**

◯ Forward it with “Is this true?” ◯ Check before you share it ◯ Trust it: videos can’t be faked

◯ Share it fast to warn people

2 **If a chatbot gives a source with a title, an author and a page number, the source must be real.**

◯ True ◯ False

3 **Which parts of an AI answer should you check most carefully? Choose all that apply.**

☐ A statistic, like “73% of homes” ☐ Whether the grammar is good

☐ A quote from a famous person ☐ A date for your history project

☐ How friendly the answer sounds

4 **Match each claim to a good way to check it.**

A date in history	• • • •	Find where the quote first appeared
A shocking video of a famous person	• • • •	Your history textbook
A quote “from a famous scientist”	• • • •	Ask your teacher
A new school rule about phones	• • • •	Trusted news sites: do they report it?

5 **Complete the sentence.**

When AI states something false as if it were true, it’s called a _____. Check what matters in _____ trusted sources, and if you can’t find it, don’t _____ it.

Word bank: use · memorise · prediction · hallucination · two

✎ **Think of something you saw or were sent online that turned out to be false, or that you’re still not sure about. How could you have checked it?**

Check your answers

Check the facts

AI · Level 2 · Lesson 3

1 **Check before you share it**

AI can make or change videos so they look real.

2 **False**

Chatbots can invent whole sources, with titles, authors and page numbers that look perfect.

3 **A statistic, like "73% of homes"; A quote from a famous person; A date for your history project**

Numbers, quotes and dates are where hallucinations hide, and where a mistake costs you.

4 **A date in history — Your history textbook**
A shocking video of a famous person — Trusted news sites: do they report it?
A quote "from a famous scientist" — Find where the quote first appeared
A new school rule about phones — Ask your teacher

Each claim has a source that is responsible for it: the textbook for history, trusted news for a public event, the original place a quote appeared, and the school itself for a school rule.

5 **When AI states something false as if it were true, it's called a hallucination. Check what matters in two trusted sources, and if you can't find it, don't use it.**

A false claim stated as fact is a hallucination.
