Lesson notes · for you

Learn, don't copy

AI · Level 2 · Lesson 4

Time
25 min

Materials
Your notes on one topic you're revising; A notebook and pen; A phone with the Darsi app (for the lab); a chatbot only if your school and family allow it

Learning goals

- Explain why you only learn what you practise yourself.
- Tell honest uses of AI from copying, and follow your school's rules.
- Say how you used AI when you hand work in.

Activity: Honest or not?

1. Warm-up (3 min): Each person names something that got easier with practice: a sport, an instrument, a recipe. Who did the practising? That is why nobody else can practise for you.
2. Sort (7 min): Sort eight request cards into two piles, learning and copying, such as "Quiz me on chapter three", "Write my essay", "Check my answer but don't fix it" and "Answer these ten questions". Talk about any card you disagree on.
3. Tutor round (8 min): In pairs, one person plays the AI tutor and asks five questions on a topic you're revising, one at a time; the other answers without notes, then hears what they missed. Swap.
4. Write the note (4 min): Each person writes the one-line note they would add to a piece of homework if they had used AI, saying what they used it for and what they did themselves.
5. Wrap-up (3 min): Pick one task you have this week and write down your school's or teacher's rule for AI on it. If you don't know it, write the question you'll ask your teacher.

For a revision group or at home. Write eight request cards (four that help you learn and four that do the work for you) and five questions on a topic you're all revising.

Discussion

- Why doesn't changing a few words make copied work yours?
- When is it fine to see the answer? (Think: checking your own work.)
- Why might a detector wrongly flag someone's real work, and what protects you?

Check yourself

- Write the one-line note you would add to your next homework if you used AI.

Try it this week
Pick one topic and, if you're allowed to use AI, make it your tutor: ask it to quiz you, answer every question yourself, then ask it to explain your mistakes.

Worksheet

Learn, don't copy

AI · Level 2 · Lesson 4

Name _____ Class _____ Date _____

1 **You used AI to explain a topic, then did the work yourself. What should you do when you hand it in?**

◯ Hide it: nobody needs to know ◯ Nothing: explaining doesn't count ◯ Say how you used AI

◯ Wait and see if the teacher asks

2 **Your school allows AI for this homework. Which of these are honest uses? Choose all that apply.**

☐ "Write my essay on floods." ☐ "Check my answer and show me the mistake."

☐ "Quiz me on chapter three." ☐ "Explain this step another way."

☐ Pasting the AI's answer and changing a few words

3 **Tools that claim to spot AI writing can prove whether a student used AI.**

◯ True ◯ False

4 **Put the steps of using AI as a tutor in order.**

☐ Answer each question yourself

☐ Try a few more questions on your own

☐ Ask it to explain your mistakes

☐ Pick one topic to revise

☐ Ask the AI to quiz you, one question at a time

5 **Complete the sentence.**

You learn what you _____ yourself. Use AI to explain, to quiz you and to _____ your work, and when you hand it in, _____ how you used it.

Word bank: say · hide · copy · practise · check

✎ **Think of a subject where you're tempted to let AI, or a friend, do the work. What would you lose, and how could AI help you learn it instead?**

Check your answers

Learn, don't copy

AI · Level 2 · Lesson 4

1 **Say how you used AI**

One honest line about how you used AI is enough, and your school's rules may ask for it.

2 **"Explain this step another way."; "Quiz me on chapter three."; "Check my answer and show me the mistake."**

Explaining, quizzing and pointing out mistakes all leave the thinking to you.

3 **False**

These detectors are unreliable: they can miss AI writing and wrongly flag real work, especially by people writing in a second language.

4 **Top to bottom: 3, 5, 4, 1, 2**

Choose what to revise, let the AI ask, answer yourself before you see anything else, learn from your mistakes, then practise again alone.

5 **You learn what you practise yourself. Use AI to explain, to quiz you and to check your work, and when you hand it in, say how you used it.**

Practice is what teaches you. AI can explain, quiz you and check your work, and an honest line says how you used it.
