Learn, don’t copy

AI · Level 2 · Lesson 4

Today we will

- Explain why you only learn what you practise yourself.
- Tell honest uses of AI from copying, and follow your school’s rules.
- Say how you used AI when you hand work in.

Remember

- Trying, getting it wrong and fixing it is the learning: if AI does it for you, you skip it.
- Explain, quiz me, check my work: learning. Do it for me: copying, even with words changed.
- Say how you used AI in one honest line, keep your drafts, and follow your school’s rules.

Honest or not?

1. Warm-up (3 min): Recall a time practice made something easier.
2. Sort (7 min): Sort eight AI requests into learning and copying.
3. Tutor round (8 min): In pairs, one quizzes and one answers, then swap.
4. Write the note (4 min): Write an honest one-line note for a piece of homework.
5. Wrap-up (3 min): Find your school’s rule for one task this week.

For a revision group or at home. Write eight request cards (four that help you learn and four that do the work for you) and five questions on a topic you’re all revising.

Let’s discuss

1. Why doesn’t changing a few words make copied work yours?
2. When is it fine to see the answer? (Think: checking your own work.)
3. Why might a detector wrongly flag someone’s real work, and what protects you?

Exit ticket

- Write the one-line note you would add to your next homework if you used AI.
