Review notes · for you

Talking to AI honestly: unit check

AI · Level 2 · Unit check

Materials
Paper and a pen. No device needed.

Learning goals

- How a chatbot writes
- Ask good questions
- Check the facts
- Learn, don’t copy

Activity: Team quiz

1. Make teams of three or four: friends, a study group or family
2. Read each question aloud; each team agrees on one answer
3. Reveal the answer, and one team explains why
4. Write down the hardest question to revise tomorrow

Discussion

- Which habit from this unit will you use first?
- Which question surprised you, and why?
- What would you tell a younger student about using AI honestly?

Check yourself

- One habit I will use, and on which homework

Try it this week
Pick the habit from this unit you need most (a clear prompt, a fact check, or an honest note on how you used AI) and use it on your homework this week.

Quiz sheet

Talking to AI honestly: unit check

AI · Level 2 · Unit check

Name _____ Class _____ Date _____

1 **How does a chatbot write its answer?**

- ◯ A person types the answer behind the scenes
- ◯ It predicts one likely piece at a time
- ◯ It looks up every word in a dictionary
- ◯ It copies a whole answer from one website

2 **A chatbot is just as good in every language, because it learned from the whole internet.**

◯ True ◯ False

3 **Match each part of a good prompt to an example.**

What you want	• • • •	"I'm in Grade 7."
What you already know	• • • •	"Explain how to add a half and a third."
Your level	• • • •	"Step by step, with one short example."
The form of the answer	• • • •	"I can add fractions with the same denominator."

4 **You want to revise for a test, not just get answers. Which request is best?**

- ◯ "Tell me everything about the topic."
- ◯ "Answers to the test."
- ◯ "Quiz me with five questions, one at a time."
- ◯ "Write my revision notes for me."

5 **Which of these should stay out of a prompt? Choose all that apply.**

- ☐ A photo of your friend
- ☐ Your school year
- ☐ Your home address
- ☐ Your password
- ☐ The topic of your homework

6 **Put the steps for checking a claim in order.**

- ☐ Find a second trusted source that agrees
- ☐ Spot a claim that matters: a number, date, name or quote
- ☐ Use it, or leave it out if you can't confirm it
- ☐ Look for it in a trusted source

7 **Asking a chatbot "Are you sure?" is a good way to check its facts.**

◯ True ◯ False

8 **A chatbot's answer quotes a study, with a title, an author and a page number. You can't find the study anywhere. What is most likely?**

- ◯ It's a real study only the chatbot can reach
- ◯ It's a real study, just too new to be online
- ◯ It's real, but only libraries abroad have it
- ◯ The chatbot invented it: a hallucination

9 **Complete the sentence.**

Honest use means AI helps you _____, and you say _____ you used it. Handing in AI's work as yours is _____.

Word bank: finish · learn · how · sharing · copying

10 **Your teacher says AI may check your work, but not write it. Which of these follow the rule? Choose all that apply.**

- ☐ "Point out my spelling mistakes; I'll fix them."
- ☐ "Write the conclusion for me."
- ☐ "Rewrite my paragraph so it sounds better."
- ☐ "Check my answers and show me where I went wrong."

Check your answers

Talking to AI honestly: unit check

AI · Level 2 · Unit check

1 **It predicts one likely piece at a time**

A language model writes token by token, each time choosing a likely next piece from patterns it learned.

2 **False**

There is far more text online in English than in Arabic, Hausa or Swahili, so a chatbot has learned fewer patterns in many languages and guesses more in them.

3 **What you want — "Explain how to add a half and a third."**
What you already know — "I can add fractions with the same denominator."
Your level — "I'm in Grade 7."
The form of the answer — "Step by step, with one short example."

Together the four parts tell the chatbot what you need, where to start, which words fit you and how to set out the answer.

4 **"Quiz me with five questions, one at a time."**

Being quizzed makes you recall what you know and shows your gaps: that's revision.

5 **Your home address; A photo of your friend; Your password**

Your address, your password and photos of other people are personal data: they don't help the answer, and some tools keep chats.

6 **Top to bottom: 3, 1, 4, 2**

First decide what to check, then confirm it in two trusted sources that don't just copy each other.

7 **False**

It can repeat its mistake just as confidently.

8 **The chatbot invented it: a hallucination**

Chatbots can invent whole sources that look perfect.

9 **Honest use means AI helps you learn, and you say how you used it. Handing in AI's work as yours is copying.**

AI that helps you learn, plus an honest note on how you used it, is honest use.

10 **"Check my answers and show me where I went wrong."; "Point out my spelling mistakes; I'll fix them."**

Checking and pointing out mistakes leave the writing to you, so they follow the rule.
