A stack of neurons

University, 1

The cut

- One neuron, one cut
- A stack can bend

What bends it

- The activation
- Without it, still one line

A one-phone seminar

1. Vote (5 min): Can one line split it?
2. By hand (10 min): One forward step.
3. Playground (15 min): No bend, then a bend.
4. Mark (10 min): What the activation does.
5. Exit (5 min): The part that bends.

Ask

1. Why is depth not the same as “more”?

Exit ticket

- Name the part that bends the stack.
