A picture is a grid of numbers

University, vision 1

In this lecture

- Read a picture as one or three matrices.
- Compute one filter output by hand.
- Say what edge, blur and sharpen filters do.

A filter

- Mixes neighbours
- Does not name objects

By hand, then the lab

1. Warm-up (5 min): What does a filter see?
2. By hand (15 min): One output
3. Lab (15 min): Edges, blur, sharpen
4. Discuss (5 min): Cross out the names
5. Exit (5 min): What does a filter mix?

Ask

1. What is the filter mixing?

Exit ticket

- A filter does not know the name of what?
