Who a detector misses

University, vision 2

In this lecture

- Stack convolution, ReLU and pooling.
- Score drawings against a prototype.
- Report the miss rate for each group.

The miss

- A wider face scores low
- A box stays low

Read the scores

1. Warm-up (5 min): What does each part throw away?
2. Lab (15 min): Hit, miss or rejection
3. Numbers (10 min): Miss rate per group
4. Rule (10 min): Drawn patterns only
5. Exit (5 min): Who was missed?

Ask

1. Why is the training shape not a test?

Exit ticket

- Name the group the detector missed.
