Squeeze and sample

University, vision 3

In this lecture

- Squeeze a picture into a short code and rebuild it.
- Say what a VAE adds: a cloud to sample from.
- Read the difference after one nudge.

A nudge

- A new blob
- Not a repair

Leave it, then move it

1. Warm-up (5 min): Does it understand?
2. Lab (15 min): Leave it, then move it
3. Explain (10 min): Encoder, decoder, loss
4. Repair (10 min): Name the two numbers
5. Exit (5 min): Rebuild or invent?

Ask

1. What did the code throw away?

Exit ticket

- A nudged code rebuilds, or invents?
