Lecture plan · for the lecturer

Laws, tests and a person who can look

University, scale 3

Time
45 min

Materials
A phone with Darsi; Paper for the rubric line; The slides from the kit

Learning goals

- Test before use
- Keep actions visible
- A person remains responsible

Activity: In the lab

1. Mark all ten
2. Flip one refusal

Discussion

- What did 90 percent hide?

Exit ticket

- Name one case the model must refuse.

Try it in your next lecture
Put that line on the rubric before the lab, not after someone celebrates a score.

Seminar sheet · for students

Laws, tests and a person who can look

University, scale 3

Name _____ Group _____ Date _____

1 **A model scores perfectly on its training cases and answers a case it should refuse. The suite…**

◯ Has not passed ◯ Needs no refusal cases ◯ Has passed

2 **Three duties: test before use, keep actions visible, and keep a person responsible.**

◯ True ◯ False

3 **Match the duty.**

Test before use	• • • •	A harmful action is not nobody's
Visible actions	• • • •	A set of cases, including a refusal
A person responsible	• • • •	Someone can see what the system did

4 **Order a check before trust.**

☐ Include one the model must refuse

☐ Read a miss before you ship

☐ Write the cases

Answers · for the lecturer

Laws, tests and a person who can look

University, scale 3

1 **Has not passed**

One missed refusal fails the suite. The other scores do not cancel it, and a suite without refusal cases never tested the duty at all.

2 **True**

True. Each duty answers a different failure: a model nobody tested, an action nobody can see, and a harm nobody owns.

3 **Test before use — A set of cases, including a refusal**
Visible actions — Someone can see what the system did
A person responsible — A harmful action is not nobody's

A score without a refusal case misses the first duty.

4 **Top to bottom: 2, 3, 1**

The refusal is part of the test, not an extra.

For you to think about

What number will you refuse to accept without the refusal cases?
