Lesson plan · for the teacher

Fakes: voices, faces and messages

AI security · Level 1 · Lesson 3

Time
40 min

Materials
Three pretend urgent messages written on paper (an uncle asking for credit, a “prize”, a friend in trouble); Board and chalk

Learning goals

- Explain how AI fakes voices, faces and messages.
- Use a routine: pause, call back, code word.
- Respond well when a fake targets someone.

Activity: Pause and check

1. Warm-up (5 min): Ask pupils whether a message, call or post has ever made them feel they had to act right now. What did it want them to do?
2. Teach (8 min): Explain that computers can now copy a voice from a short recording and swap faces in pictures, so how something looks or sounds is not proof. Teach the routine: pause, check on another channel, use a code word.
3. Pause and check (15 min): Read three pretend urgent messages in a hurried voice: an uncle asking for credit, a “prize” that needs a code, a friend in trouble. For each, pupils say first what they feel like doing, then what they should do.
4. Poster (7 min): Groups make a poster with the three steps and one example each. Put the best one up in the classroom.
5. Wrap-up (5 min): Ask pupils to agree a code word with their family at home and to keep it secret. Then give the exit ticket.

Make the messages clearly pretend, with made-up names, and never use a real person's voice or photo. If a pupil shares a real fake that hurt someone, follow your school's safeguarding procedure.

Discussion

- Why do fakes try to rush us?
- Why is replying in the same chat not a real check?
- What should we do if a fake picture of a classmate appears?

Exit ticket

- Write the three steps you take before acting on an urgent message.

Try it in class tomorrow
Play “Pause and check”: read out a pretend urgent message from someone the class knows (“It's your uncle, send credit now!”). Pupils say what they would do, and the class agrees one way to check, such as calling back on a saved number or a family code word.

Worksheet · for pupils

Fakes: voices, faces and messages

AI security · Level 1 · Lesson 3

Name _____ Class _____ Date _____

1 **A video of the head teacher saying school is closed tomorrow is going round. It looks real. What's the best check?**

- ◯ See how many people shared it
- ◯ Check the school's usual channel
- ◯ Look closely for glitches

2 **Match each fake to the check that beats it.**

A voice note asking for money	• • • •	Check the school's usual channel
A video announcing a school closure	• • • •	Call back on the saved number
A message from a colleague's “new number”	• • • •	Go to the site yourself, not through the link
An urgent email with a link to “log in”	• • • •	Ask something only they would know

3 **If a voice note sounds exactly like someone you know, it must be from them.**

- ◯ True
- ◯ False

4 **A fake picture of a pupil is spreading in a class group. Which steps are right? Choose all that apply.**

- ☐ Report it through the school's procedure
- ☐ Ask for it to be deleted
- ☐ Reply in the group to mock whoever made it
- ☐ Check that the pupil is safe and supported
- ☐ Forward it to colleagues so they know

5 **Complete the routine.**

Pause, call _____ on the number you saved, and agree a _____ word for money.

Word bank: code · long · back · quickly

Answers · for the teacher

Fakes: voices, faces and messages

AI security · Level 1 · Lesson 3

1 **Check the school's usual channel**

Glitches get fixed with every new tool, and many shares prove nothing.

2 **A voice note asking for money — Call back on the saved number**
A video announcing a school closure — Check the school's usual channel
A message from a colleague's "new number" — Ask something only they would know
An urgent email with a link to "log in" — Go to the site yourself, not through the link

Every check uses a channel you already trust instead of the message itself: your saved number, the school's usual group, a shared secret, the site you know.

3 **False**

A short clip can be enough for AI to copy a voice.

4 **Check that the pupil is safe and supported; Ask for it to be deleted; Report it through the school's procedure**

Care for the person, stop the spread and report it properly.

5 **Pause, call back on the number you saved, and agree a code word for money.**

Pausing beats the rush, a call back on a number you trust beats a copied voice, and a code word beats a fake that knows your details.

For you to think about

Who could a fake of you, or of someone at your school, try to fool? Which second channel would you use to check?
