Review plan · for the teacher

Using AI safely at school: unit check

AI security · Level 1 · Unit check

Time
45 min

Materials
Board, chalk, paper. No devices needed.

Learning goals

- What you type can travel
- Confident, wrong and risky
- Fakes: voices, faces and messages
- Who wrote this? Detectors and fair rules

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which habit will you use first?
- Which question surprised you, and why?
- What will you tell your colleagues about AI fakes?

Exit ticket

- One habit I will use, and when I will use it

Try it in class tomorrow
Pick the habit from this unit your class needs most (the noticeboard test, the stakes ladder, pause and call back, or the five rules), use it this week, and tell a colleague how it went.

Quiz sheet · for each team

Using AI safely at school: unit check

AI security · Level 1 · Unit check

Team _____ Date _____

1 **Which of these are red: never typed into a chatbot? Choose all that apply.**

- [ ] A pupil's name with her marks
- [ ] A story idea about the rainy season
- [ ] Next week's exam paper
- [ ] "A Primary 5 class of 60 with no lab"
- [ ] The staffroom Wi-Fi password

2 **Describing the situation without the child's name usually gets you the same help from a chatbot.**

- ○ True
- ○ False

3 **An AI answer explains how to treat a pupil's burn. What check does it need?**

- ○ Read it once: it sounds sure
- ○ Ask two more chatbots
- ○ A health worker or official first-aid guide, and a person decides

4 **Match each AI answer to the check it needs.**

A story idea for Primary 3	Ask a health worker
A quiz on photosynthesis	Check the official notice
Advice about a pupil's medicine	Read it through
A summary of new exam rules	Check it against the textbook

5 **A colleague says: "The computer worked it out, so it must be right." What is this called?**

- ○ Automation bias: trusting a machine because it is a machine
- ○ A data leak
- ○ A knowledge cut-off

6 **A voice note "from the head teacher" asks you to send money urgently. Put the safe steps in order.**

- [ ] Call back on the number you saved
- [ ] Pause: don't act yet
- [ ] Report it if it was a fake
- [ ] Don't reply in the same chat

7 **A fake message made with AI will usually have spelling mistakes you can spot.**

- ○ True
- ○ False

8 **Your class rules allow AI for planning, if pupils say so. A pupil says she planned her essay with AI and wrote it herself. What happens?**

- ○ Zero: AI was used
- ○ Mark it as usual: she followed the rule and said so
- ○ Run a detector to be sure

9 **Why is an AI detector's score not proof? Choose all that apply.**

- [ ] It can see who typed the essay
- [ ] Honest writing is sometimes flagged
- [ ] A few edits can erase the signal
- [ ] Writers in a second language are flagged more often

10 **Complete the five class rules for AI.**

Keep it out, check it, _____ it, be _____, tell someone.

Word bank: share · verify · fast · fair

Answers · for the teacher

Using AI safely at school: unit check

AI security · Level 1 · Unit check

1 **A pupil's name with her marks; The staffroom Wi-Fi password; Next week's exam paper**

Names with marks, passwords and unreleased exams are red.

2 **True**

The chatbot works from the situation: age, need, resources.

3 **A health worker or official first-aid guide, and a person decides**

Health is high stakes: a confident mistake could hurt a child.

4 **A story idea for Primary 3 — Read it through**
A quiz on photosynthesis — Check it against the textbook
Advice about a pupil's medicine — Ask a health worker
A summary of new exam rules — Check the official notice

The check grows with the stakes: low stakes, read it; teaching content, the textbook; health, an expert; rules, the official source.

5 **Automation bias: trusting a machine because it is a machine**

Automation bias is trusting an answer because a machine gave it.

6 **Top to bottom: 3, 1, 4, 2**

Urgency is the trick, so pause first. Check on a channel you already trust, never the one the message came from, and report fakes so others are warned.

7 **False**

AI writes fluent, correct text, and clones voices from short clips, so spelling and glitches are no longer reliable signs.

8 **Mark it as usual: she followed the rule and said so**

She did what the rule asks: used AI where it's allowed and said so.

9 **Honest writing is sometimes flagged; A few edits can erase the signal; Writers in a second language are flagged more often**

Detectors guess from patterns: they raise false alarms, lose the signal after small edits, and flag second-language writers more.

10 **Keep it out, check it, verify it, be fair, tell someone.**

Keep personal data out, check answers by the stakes, verify fakes and requests on a second channel, be fair before accusing anyone, and tell someone when things go wrong.
