Protecting models and data: review

AI security · Level 3 · Unit check

In this unit

- Poisoned data
- Models that remember too much
- Pictures that fool a model
- Is this the real model?

The big ideas

- Wrong examples in, wrong model out: guard your data
- Models can memorise: keep personal data out
- Sure isn't safe: test with nudges, a person decides
- Check fingerprints and signatures before you run a model

Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Let’s discuss

1. Which check will you start with at your school?
2. Which question surprised you, and why?
3. How would you explain a fingerprint to a colleague?

Exit ticket

- One check I will start using, and where
