# A policy that holds

## AI security · Level 4 · Lesson 3

# Today we will

- Write the security parts of a school AI policy on one page.
- Ask the right questions before approving a tool.
- Turn rules people must remember into checks systems enforce.

# Remember

- One page, plain words, your community's languages.
- Approve tools with questions: data, age, powers, law, owner.
- If it matters, make the system enforce it; review each term.

# One-page policy workshop

1. Warm-up (5 min): Which rule here is most often forgotten?
2. Draft (20 min): Each group writes one part of the page.
3. Enforce (10 min): Mark each rule “remember” or “enforced”.
4. Check (10 min): Read it as a parent and as a pupil.
5. Close (5 min): Agree an owner and a review date.

**Bring the risk map from lesson 1 and any policy the school already has. Invite two pupils: they know which tools are really used.**

# Let’s discuss

1. Which of our rules depend only on people remembering?
2. What should happen when a teacher reports a mistake?
3. How will parents and pupils learn what the policy says?

# Exit ticket

- Write one rule you will turn into an enforced check, and how.
