AI security policy and red teaming at school: review

AI security · Level 4 · Unit check

In this unit

- Map your school's AI risks
- Red-team a school chatbot
- A policy that holds
- When AI goes wrong

The big ideas

- List every AI tool; score risks as likelihood × impact; name an owner
- Red-team with permission and made-up data; rate severity; report to the owner first
- If it matters, make the system enforce it: allow-lists and approval
- Incidents: contain, protect people, keep evidence and report, learn

Team quiz, then a plan

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Finish by putting dates on the school's next AI security steps

Let’s discuss

1. Which part of this unit does our school need first?
2. Which of our rules could become an enforced check?
3. Who will own our AI risk map, and when will we review it?
