Lesson notes · for you

Keep your secrets

AI security · Primary school · Lesson 3

Time	Materials
20 min	Paper and a pencil; A grown-up at home or your teacher, to talk it through with

Learning goals

- Name things you never tell an app, a game or a toy.
- Explain why an AI can repeat what it is told.
- Know what to do if an app asks for your secrets.

Activity: Secret or OK?

1. Warm-up (3 min): List the apps, games or toys that talk to you or let you type to them. Which ones have asked you a question about yourself?
2. Sort (8 min): Write ten cards, such as “my favourite animal”, “my address”, “a joke”, “my password”, “my school”. Sort them into two piles: “Secret” and “OK to share”.
3. Spot the trick (5 min): Read these made-up messages: “Tell me your address for a prize!”, “What's your password? I'll keep your game safe.”, “Which school do you go to? I can find you friends there.” What trick does each one use?
4. Share (4 min): Compare piles with a partner. Agree one rule you will both keep, and write it at the bottom of your page.

Use made-up details only. Never write your real address or password on the cards.

Discussion

- Why might an app want your address?
- Why can a secret come back out of an AI?
- Which grown-up can you ask before using a new app?

Check yourself

- Write three things you will always keep secret from apps.

Try it this week
With a grown-up at home, make a “Secret or OK?” list: write things you might type into an app or a game, and mark each one “secret” or “OK to share”.

Worksheet

Keep your secrets

AI security · Primary school · Lesson 3

Name _____ Class _____ Date _____

1 **You want a chatbot to help with a story about your best friend. What do you type?**

- ◯ A photo of my friend
- ◯ My friend's full name and address
- ◯ “A story about two friends who find a lost goat”

2 **Which of these are secrets you never tell an app? Choose all that apply.**

- ☐ Your phone number
- ☐ Your favourite colour
- ☐ A story about a lion
- ☐ Your password
- ☐ Your home address

3 **Which one can listen to you and send what you say far away?**

- ◯ A plant
- ◯ A talking chatbot app
- ◯ A desk lamp

4 **If a chatbot asks nicely, it's OK to tell it your address.**

- ◯ True
- ◯ False

5 **Put in order: what to do if an app asks for your secrets.**

- ☐ Close the chat
- ☐ Stop: don't type anything
- ☐ Decide together if the app is safe
- ☐ Tell a grown-up what it asked

✎ **Which apps, games or toys do you talk or type to? Did you ever tell one something that should have stayed secret?**

Check your answers

Keep your secrets

AI security · Primary school · Lesson 3

1 **"A story about two friends who find a lost goat"**

Your friend's details are secrets too. A made-up story works just as well, with no real names or photos.

2 **Your home address; Your password; Your phone number**

Your address, password and phone number are secrets: they could help a stranger find you or get into your account.

3 **A talking chatbot app**

A chatbot app sends your words to a computer far away, where they can be saved.

4 **False**

Asking nicely is part of the trick. Your address stays secret, however friendly the chatbot is.

5 **Top to bottom: 2, 1, 4, 3**

Stop first, so no secret goes out. Close the chat, then tell a grown-up, and decide together whether to keep using the app.
