Lesson notes · for you

AI-powered scams

AI security · Lower secondary · Lesson 2

Time	Materials
20 min	Paper and a pen; Your phone, or a family phone with its owner's permission (optional)

Learning goals

- Explain what AI changes about scams, and what it can't change.
- Beat copied voices and taken-over accounts with a second channel.
- Spot fake AI apps before you install them.

Activity: Scam or real?

1. Warm-up (3 min): List the scam signs you remember from earlier lessons: rush, prize, codes, strange links, bad spelling. Circle the ones AI can remove.
2. Sort (7 min): Read eight short messages (from your teacher or written by your group, all made up). For each, decide scam or real, and write which sign gave it away. Notice that perfect spelling doesn't help.
3. Plan (6 min): Write a three-line plan for your family: pause, check on a second channel or ask for the code word, never share codes. Don't write the code word itself.
4. Share (4 min): Swap plans with a partner. Improve one line of theirs, and explain why.

All messages are made up. Never write a real code word, a real number or a real account on the sheet.

Discussion

- Why doesn't a familiar voice prove who is calling?
- Who in your family would be easiest to trick, and how could you help them?
- Why is a scammer's request still the best clue?

Check yourself

- Write the three steps of your family's plan, and one sign of a fake AI app.

Try it this week
Agree a family code word at home, and decide together when to ask for it. Then check the apps on your phone, or a family phone with its owner: delete any you don't recognise or that ask for far more than they need.

Worksheet

AI-powered scams

AI security · Lower secondary · Lesson 2

Name _____ Class _____ Date _____

1 **A voice note sounds exactly like your uncle: he's stuck and needs mobile money now. What's your first move?**

- ◯ Reply in the chat and ask him to prove it
- ◯ Call him on his usual number, or ask for the family code word
- ◯ Send the money: it's his voice

2 **Which signs still help you spot a scam, even when AI wrote it? Choose all that apply.**

- ☐ It has a link to a look-alike site
- ☐ It rushes or threatens you
- ☐ It has spelling mistakes
- ☐ The voice sounds strange
- ☐ It asks for a code or a password

3 **A message that uses your name and your school must come from someone you know.**

◯ True ◯ False

4 **Match each situation to the habit that protects you.**

A voice note asks for money in a hurry	• • • •	Use the official app store
A “friend” asks for your sign-in code	• • • •	Tell an adult and change your password
A “free premium AI” app from a website	• • • •	Call back on the usual number
You already sent a code	• • • •	Never share codes

5 **Complete the rule.**

Verify on a _____ channel, and never share a _____.

Word bank: same · second · photo · code

✎ **Which AI scam do you think would be hardest for your family to spot: a copied voice, a perfect message or a fake app? What would protect them?**

Check your answers

AI-powered scams

AI security · Lower secondary · Lesson 2

1 **Call him on his usual number, or ask for the family code word**

A voice can be copied from a short clip, and a scammer can happily answer in the same chat.

2 **It rushes or threatens you; It asks for a code or a password; It has a link to a look-alike site**

Rushing, asking for codes and look-alike links are about what the scammer wants, so AI can't remove them.

3 **False**

Your name, school and friends are often public, and AI mixes them into personal-sounding messages.

4 **A voice note asks for money in a hurry — Call back on the usual number**
A "friend" asks for your sign-in code — Never share codes
A "free premium AI" app from a website — Use the official app store
You already sent a code — Tell an adult and change your password

Each trick has a habit that beats it, without needing to spot the fake: a second channel, codes kept secret, official stores, and acting fast if something went wrong.

5 **Verify on a second channel, and never share a code.**

A second channel, one you already trust, beats a copied voice or a taken-over account.
