Teaching and assessing code: review

Programming · Level 3 · Unit check

In this unit

- Read before you write: PRIMM
- Parsons problems
- Teaching debugging
- Misconceptions and feedback

The big ideas

- Pupils predict and trace before they write
- Parsons problems: one order, real distractors, on paper
- Debugging is a routine you teach; ask, don’t fix
- Hinge questions find misconceptions in seconds

Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. For each wrong option, name the misconception behind it
4. Write the hardest question on the board for tomorrow

Let’s discuss

1. Which technique will you use first, and with which class?
2. Which question surprised you, and why?
3. Which misconception will you look for next week?

Exit ticket

- One change I will make to how I teach programming
