A scheme of work

Programming · Level 4 · Lesson 4

Today we will

- Plan progression: unplugged, blocks, then Python.
- Build a term of units with assessment points and a device timetable.
- Make it last: inclusion, a club, colleagues.

Remember

- Each stage builds on the one before.
- One big idea and one assessment point per unit.
- Shared folder, trained colleagues, a club.

Plan a term together

1. Warm-up (5 min): What do pupils meet in computing now, grade by grade?
2. Ladder (10 min): Draw the progression on the board.
3. Units (15 min): Pairs plan one unit each.
4. Timetable (5 min): Share the devices fairly.
5. Wrap-up (5 min): Who teaches which unit? Exit ticket.

This is a session for colleagues, not pupils: run it in a staff meeting or a planning day.

Let’s discuss

1. Where does our school repeat the same computing ideas?
2. Which grade has nothing yet?
3. Who will keep the scheme going if we leave?

Exit ticket

- Write one unit for our scheme: its big idea and its assessment point.
