If this, then that

Programming · Level 1 · Lesson 3

In this lesson you will

- Say what a decision is.
- Use AND and OR in simple rules.
- Test a rule in every case.

Key ideas

- IF true, do this; ELSE, do that.
- AND: both. OR: one is enough.
- Two things to check: four cases.

Activity: Simon says IF

1. Warm-up (3 min): Simon says IF … ELSE.
2. Play (7 min): Add AND and OR to the rules.
3. Make (7 min): Write your own rule card.
4. Test (3 min): Try your rule in every case.

Keep the rules kind: no rule should single out one person.

Let’s discuss

1. What is the difference between AND and OR?
2. Why test every case?
3. Which rules at home or at school use AND or OR?

Exit ticket

- Write one rule with AND and one with OR.
