Give instructions: review

Programming · Level 1 · Unit check

In this unit

- Exact instructions
- Loops
- If this, then that
- Find and fix bugs

The big ideas

- A robot does exactly what you say, in order
- A loop says a step once, and how many times
- AND needs both; OR needs one
- Find the first wrong step, change one thing, test again

Activity: The robot relay

1. Warm-up (3 min): Remember one idea from each lesson.
2. Plan (7 min): In teams, write a robot program for a chalk grid.
3. Run (7 min): Another team’s robot follows it exactly.
4. Fix (3 min): Find and fix any bug.

Let’s discuss

1. Which lesson did you like best, and why?
2. Which question was hardest?
3. Where will you use loops or rules at home?
