Assessing programming at scale

Programming · University · Lecture 4

In this lecture

- Design strong test suites.
- Give useful feedback.
- Protect integrity by design.

Remember

- Tests are the assessment.
- Hints, not fixes.
- Explain and modify.

Break the submission

1. Warm-up (5 min): Would it pass?
2. Test (20 min): Hidden tests.
3. Feedback (15 min): Messages.
4. Policy (15 min): AI assistance.
5. Wrap-up (5 min): One-minute paper.

Let’s discuss

1. Which test broke the most submissions?
2. When does a hint become a fix?
3. What will your policy allow?

Exit ticket

- Write one hidden test for your next assignment.
