Lesson plan · for the teacher

Lock down your phone

Cyber safety · Level 1 · Lesson 3

Time
40 min

Materials
Board and chalk, or a large paper phone drawing; 12 problem cards on scrap paper; A paper or cardboard phone for the role-play; Worksheet: Phone check-up (one per pair, optional)

Learning goals

- Name six habits that keep a phone safe.
- Choose the right fix for a phone safety problem and explain why.
- Explain why a lock code like 1234 or a birthday is unsafe.

Activity: Phone safety clinic: Phone clinic

1. Warm-up (5 min): Ask what is on a family phone that a stranger shouldn't see or use. List answers on the board: photos, messages, mobile money, contacts.
2. Teach (8 min): Walk through the six icons. For each, give one sentence and one risky example: 1234, an app sent in a chat, a torch app wanting contacts, no backup.
3. Phone clinic (14 min): Pairs take turns: one is the phone owner with a problem card, the other is the "phone doctor" who points to an icon and explains the fix. Swap after each card. Walk around and listen.
4. Share (7 min): Three pairs act out their trickiest card for the class. The class votes on the fix with thumbs up or down.
5. Wrap-up (6 min): Exit ticket: pupils draw one icon and write the habit it stands for. Suggest they check one setting on a family phone with an adult tonight.

Draw a large phone on the board with six icons around it: padlock, update arrow, store bag, eye, map pin, backup box. Write 12 problem cards, such as "My code is 1234", "A game wants my messages" and "I lost my phone".

Discussion

- If a stranger picked up this phone, what could they see or do?
- Doctor, which icon fixes this problem — and why?
- Do we agree with the doctor?

Exit ticket

- Draw one phone safety icon and write the habit it stands for.

Try it in class tomorrow
Run a phone clinic role-play: Draw a big phone on the board with six icons: lock, update arrow, store bag, eye, map pin, backup box. Give pairs problem cards — "My code is 1234", "A game wants my messages", "I lost my phone" — and let the "phone doctor" choose the fix.

Worksheet · for pupils

Lock down your phone

Cyber safety · Level 1 · Lesson 3

Name _____ Class _____ Date _____

1 **Which screen lock is the safest choice?**

◯ No lock — it's quicker ◯ A six-digit PIN with no link to you ◯ 1234 ◯ Your birth year

2 **Updates just slow your phone down, so it's safer to skip them.**

◯ True ◯ False

3 **Which app is asking for something it doesn't need?**

◯ Map app wants your location ◯ Camera app wants the camera

◯ Torch app wants your contacts ◯ Voice notes app wants the microphone

4 **A colleague's phone was left on a bus. Which settings help her now?**

☐ A backup of her photos and contacts ☐ A bright phone case ☐ Lots of free games

☐ A strong screen lock ☐ "Find my device", switched on earlier

5 **Match each setting to what it protects against.**

Strong screen lock	• • • •	Known security holes
Updates	• • • •	Losing photos and contacts
Official app store	• • • •	Someone picking up your phone
Backup	• • • •	Fake apps sent in chats

Answers · for the teacher

Lock down your phone

Cyber safety · Level 1 · Lesson 3

1 **A six-digit PIN with no link to you**

A six-digit PIN with no link to you is longer than four digits and has nothing a stranger could guess from knowing you.

2 **False**

Many updates fix security holes that criminals could use.

3 **Torch app wants your contacts**

A torch only needs to switch on the light.

4 **"Find my device", switched on earlier; A backup of her photos and contacts; A strong screen lock**

"Find my device" lets her ring, lock or erase the phone from another one, the backup means her photos and parents' numbers aren't lost with it, and a strong screen lock stops whoever finds it from opening her email or mobile money.

5 **Strong screen lock — Someone picking up your phone**
Updates — Known security holes
Official app store — Fake apps sent in chats
Backup — Losing photos and contacts

Each setting blocks a different problem — together they make a quick phone check-up.

For you to think about

Which one setting will you check on your phone today — and which colleague could you help to do the same?
