Lock down your phone

Cyber safety · Level 1 · Lesson 3

Today we will

- Name six habits that keep a phone safe.
- Choose the right fix for a phone safety problem and explain why.
- Explain why a lock code like 1234 or a birthday is unsafe.

Phone safety check-up

- Use a strong screen lock
- Install updates
- Safe apps, few permissions
- Turn on find my device
- Back up photos and contacts

Phone safety clinic: Phone clinic

1. Warm-up (5 min): Ask what is on a family phone that a stranger shouldn’t see or use.
2. Teach (8 min): Walk through the six icons.
3. Phone clinic (14 min): Pairs take turns: one is the phone owner with a problem card, the other is the “phone doctor” who points to an icon and explains the fix.
4. Share (7 min): Three pairs act out their trickiest card for the class.
5. Wrap-up (6 min): Exit ticket: pupils draw one icon and write the habit it stands for.

Draw a large phone on the board with six icons around it: padlock, update arrow, store bag, eye, map pin, backup box. Write 12 problem cards, such as “My code is 1234”, “A game wants my messages” and “I lost my phone”.

Let’s discuss

1. If a stranger picked up this phone, what could they see or do?
2. Doctor, which icon fixes this problem — and why?
3. Do we agree with the doctor?

Exit ticket

- Draw one phone safety icon and write the habit it stands for.
