Review plan · for the teacher

Passwords and phishing: unit check

Cyber safety · Level 1 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Passphrases you can remember
- Spot a phishing message
- Lock down your phone
- Safer school WhatsApp groups

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which idea will you use first?
- Which question surprised you, and why?
- What will you tell your family about this unit?

Exit ticket

- One idea I will use, and when I will use it

Try it in class tomorrow
Pick the habit from this unit your pupils need most, teach it this week, and tell a colleague how it went.

Quiz sheet · for each team

Passwords and phishing: unit check

Cyber safety · Level 1 · Unit check

Team _____ Date _____

1 **Which is the best way to make a password that is strong and easy to remember?**

- ◯ Three random words joined together
- ◯ A short word with @ instead of a
- ◯ One strong password used for every account
- ◯ Your name, your birth year and a symbol

2 **You should change your passwords every month, even if nothing has gone wrong.**

- ◯ True
- ◯ False

3 **Which of these are warning signs of a phishing message?**

- ☐ "You have won a laptop — pay a small delivery fee"
- ☐ A message written in your own language
- ☐ A notice you expected from the school's saved number
- ☐ "Your account will be closed in 24 hours"
- ☐ A request for the one-time code just sent to you

4 **You clicked a link in a fake message and typed your password. Put the next steps in order.**

- ☐ Change it anywhere else you used it
- ☐ Close the page and type nothing more
- ☐ Report the message, then delete it
- ☐ Change that password right away

5 **Which phone lock is the safest?**

- ◯ No lock at all
- ◯ PIN 1234
- ◯ Six-digit PIN with no link to you
- ◯ PIN of your birth year

6 **Match each phone habit to what it protects against.**

Install updates	• • • •	Not knowing where a lost phone is
Official app store only	• • • •	Security holes criminals could use
Turn on find my device	• • • •	Losing parents' numbers and photos
Back up photos and contacts	• • • •	Harmful apps sent in chats

7 **Complete the sentence.**

Never share a password, _____ or one-time _____ — and check odd requests through another _____.

Word bank: link · symbol · code · PIN · channel

8 **Someone tricks a colleague into sharing the six-digit code WhatsApp sent her by text. Which setting still protects her account?**

- ◯ Muting the group
- ◯ Only admins can send messages
- ◯ A two-step verification PIN
- ◯ Turning off read receipts

9 **A message with the head teacher's name and photo must really be from the head teacher.**

- ◯ True
- ◯ False

Answers · for the teacher

Passwords and phishing: unit check

Cyber safety · Level 1 · Unit check

1 **Three random words joined together**

Three random words are long, hard to guess and easy to picture.

2 **False**

Change a password when there are signs it was stolen or shared.

3 **"Your account will be closed in 24 hours"; A request for the one-time code just sent to you; "You have won a laptop — pay a small delivery fee"**

The 24-hour threat rushes you past checking, a one-time code is for you alone and no real company asks for it, and a prize you never entered for is too good to be true.

4 **Top to bottom: 3, 1, 4, 2**

Stop the damage first, then lock your accounts.

5 **Six-digit PIN with no link to you**

Six digits with no link to you is far harder to guess than 1234 or a birthday — and any lock beats none.

6 **Install updates — Security holes criminals could use**
Official app store only — Harmful apps sent in chats
Turn on find my device — Not knowing where a lost phone is
Back up photos and contacts — Losing parents' numbers and photos

Each habit blocks a different problem. Together with a strong lock, they make a quick phone check-up.

7 **Never share a password, PIN or one-time code — and check odd requests through another channel.**

Your secrets stay with you, and checking another way gives you the real answer before you act.

8 **A two-step verification PIN**

Two-step verification asks for her own PIN when her number is set up on another phone, so the text code alone isn't enough.

9 **False**

Anyone can put a name and photo on a new number.
