Review plan · for the teacher

Protecting devices and data: unit check

Cyber security · Level 2 · Unit check

Time	Materials
45 min	Board, chalk, paper. No devices needed.

Learning goals

- Updates close the door
- Back it up: lose a phone, not your work
- Two-step sign-in and passkeys
- Safe Wi-Fi at school, at home and in town

Activity: Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Discussion

- Which habit will you set up first, and on which device?
- Which question surprised you, and why?
- Which habit will you teach your pupils this week?

Exit ticket

- One habit I will set up this week, and on which device

Try it at school tomorrow
Pick the habit from this unit your pupils need most (updating, backing up, a second lock or safe Wi-Fi), teach it this week, and tell a colleague how it went.

Quiz sheet · for each team

Protecting devices and data: unit check

Cyber security · Level 2 · Unit check

Team _____ Date _____

1 **Why are the days just after a security update is published the riskiest for phones that haven't installed it?**

- ◯ New updates always slow phones down at first
- ◯ Attackers study the fix to find the hole, then look for unpatched phones
- ◯ The phone company switches off phones that haven't updated

2 **A Windows 10 computer gets security updates as long as it's connected to the internet.**

◯ True ◯ False

3 **Which of these setups meet the 3-2-1 rule?**

- ☐ A phone and its cloud backup
- ☐ The office computer and two USB drives in the office drawer
- ☐ The office computer, a cloud backup and an external disk at the head teacher's home
- ☐ Three copies in different folders on the same laptop
- ☐ A teacher's laptop, a cloud backup and a USB drive kept at home

4 **Ransomware has locked the office computer. Put the response in order.**

- ☐ Tell the head teacher
- ☐ Note what happened and how it got in, so it can't happen again
- ☐ Unplug it from the network
- ☐ Restore the unplugged backup onto a clean computer

5 **A fake sign-in page asks for your password, then your second step. Which second step gives it nothing it can use?**

◯ A code by text message ◯ A passkey ◯ A code from an authenticator app

6 **Match each problem to the habit that protects you.**

A known hole in an app you haven't updated	• • • •	Two-step sign-in
A phone dropped in water	• • • •	Automatic updates
A stolen password	• • • •	Mobile data for money
A look-alike hotspot at the bus station	• • • •	A backup in the cloud

7 **Complete the habits.**

Turn on _____ updates. Keep one backup _____. Never share a one-time _____.

Word bank: code · update · manual · automatic · unplugged · plugged in

8 **A VPN hides your browsing from everyone, including the VPN company.**

◯ True ◯ False

9 **Which of these make a school router safer?**

- ☐ A guest network for visitors and pupils
- ☐ A new admin password
- ☐ The Wi-Fi password written on the classroom wall
- ☐ Never touching the router's settings
- ☐ WPA2 or WPA3 with a long Wi-Fi password

Answers · for the teacher

Protecting devices and data: unit check

Cyber security · Level 2 · Unit check

1 **Attackers study the fix to find the hole, then look for unpatched phones**

Publishing a fix also tells attackers where the hole was.

2 **False**

Windows 10 left normal support in October 2025.

3 **A teacher's laptop, a cloud backup and a USB drive kept at home; The office computer, a cloud backup and an external disk at the head teacher's home**

Three copies, more than one kind of storage, one away from school: the laptop with a drive at home and the office computer with a disk at the head teacher's home both pass.

4 **Top to bottom: 2, 4, 1, 3**

Stop the spread first, then bring in the person who decides.

5 **A passkey**

A passkey works only on the real site, so it never answers a fake page.

6 **A known hole in an app you haven't updated — Automatic updates**
A phone dropped in water — A backup in the cloud
A stolen password — Two-step sign-in
A look-alike hotspot at the bus station — Mobile data for money

Each lesson in this unit closes a different door.

7 **Turn on automatic updates. Keep one backup unplugged. Never share a one-time code.**

Automatic updates close holes without you remembering, an unplugged backup is out of ransomware's reach, and a one-time code is for you alone.

8 **False**

A VPN hides your traffic from the local network, like the café's, but the VPN company can see it instead.

9 **A new admin password; WPA2 or WPA3 with a long Wi-Fi password; A guest network for visitors and pupils**

A new admin password, strong Wi-Fi security and a separate guest network each close a door.
