Review plan · for the teacher

A cyber-safe school: unit check

Cyber security · Level 4 · Unit check

Time	Materials
40 min	Board, chalk, paper. No devices needed.

Learning goals

- A one-page cyber safety policy
- Risk assessment: what could go wrong?
- Incident drills: practise before it happens
- Teaching cyber safety across the school

Activity: Gallery walk: our school's next three steps

1. Warm-up (5 min): Go round the room: each person names one change made since the unit began, however small, such as a screen lock, a second admin or a backup.
2. Gallery (10 min): Pin up the four pieces of work from the unit: the one-page policy, the risk register, the drill notes and the term plan. Everyone walks past each one and reads it.
3. Gaps (10 min): On each piece, everyone adds a sticky note with one gap: a rule nobody follows, a risk with no owner, a lesson from the drill not yet acted on, a year group with no activity.
4. Plan (10 min): Together, choose the three most important gaps. Give each an owner by name and a date within the month.
5. Wrap-up (5 min): Read the three steps aloud. Agree when the cyber lead will check them, and add that date to the risk register.

Bring the four pieces of work from the unit and pin them up before the meeting. Prepare sticky notes or paper slips and tape.

Discussion

- What has changed in our school since this unit began?
- Which risk still has no owner?
- How will pupils and parents notice the difference?

Exit ticket

- The one step I own, and its date.

Try it at school tomorrow
Share your school's next three steps with the head teacher, each with an owner, and put the first one in the diary for this week.

Quiz sheet · for each team

A cyber-safe school: unit check

Cyber security · Level 4 · Unit check

Team _____ Date _____

1 **Why should a school cyber safety policy fit on one page?**

- ◯ Because one page can list every risk the school faces
- ◯ Because the signatures matter more than the details
- ◯ Because people follow rules they have read and understood

2 **Current guidance says a password should be changed when there are signs it leaked, not on a fixed schedule.**

◯ True ◯ False

3 **Which of these help a school recover after an incident? Choose all that apply.**

- ☐ A paper list of key phone numbers
- ☐ Recovery codes locked in a safe place
- ☐ A longer policy document
- ☐ A weekly backup kept away from school
- ☐ Telling staff not to talk about it

4 **The school page has been taken over and is asking parents for money. Put the response in order.**

- ☐ Warn parents on an official channel not to pay anything
- ☐ Tell the incident lead at once
- ☐ Turn on two-step sign-in for the page's accounts
- ☐ Write down the lessons and update the policy
- ☐ Recover the page with its recovery email or second admin

5 **Risk A is likely (3) but minor (1). Risk B is possible (2) and severe (3). Which scores higher?**

◯ Risk A ◯ They score the same ◯ Risk B

6 **Match each problem to the fix that solves it.**

Nobody follows the twelve-page rules in the cupboard	• • • •	A drill with roles and one voice to parents
The meeting only talks about the most frightening threat	• • • •	One page that staff help write and sign
On a bad day, five teachers tell parents five different things	• • • •	Ten-minute activities in many subjects, every term
Pupils forget the yearly assembly within weeks	• • • •	Score every risk: likelihood × impact

7 **Complete the sentence.**

In a drill, the _____ lead is the only voice to parents, the _____ keeper writes down times and decisions, and the drill tests the _____, not the people.

Word bank: technical · incident · communications · plan · record

8 **Which plan fits a spiral curriculum for cyber safety?**

- ◯ Simple habits for young pupils, deeper skills each year after
- ◯ The same assembly every year, for everyone
- ◯ Encryption keys for the youngest, passwords for the oldest

9 **If a pupil is being blackmailed with images, paying quickly is the safest way to make it stop.**

◯ True ◯ False

10 **What should a school do after a drill? Choose all that apply.**

- ☐ Write down three lessons
- ☐ Update the contact card and the policy
- ☐ File the notes and wait for next year
- ☐ Share the names of staff who made mistakes
- ☐ Turn each lesson into a change with an owner and a date

Answers · for the teacher

A cyber-safe school: unit check

Cyber security · Level 4 · Unit check

1 **Because people follow rules they have read and understood**

A policy protects only through what people do: one clear page gets read, signed and followed.

2 **True**

Current guidance (NIST, 2025) says to change a password only when there are signs of a leak.

3 **A weekly backup kept away from school; Recovery codes locked in a safe place; A paper list of key phone numbers**

Backups bring files back, recovery codes bring accounts back, and a paper contact list works when the internet doesn't.

4 **Top to bottom: 2, 1, 4, 5, 3**

Report first so one person leads, then stop the harm to parents, then recover the page, then close the door that let the attacker in, and finally learn from it.

5 **Risk B**

Risk B scores 2 × 3 = 6 and Risk A 3 × 1 = 3.

6 **Nobody follows the twelve-page rules in the cupboard — One page that staff help write and sign**
The meeting only talks about the most frightening threat — Score every risk: likelihood × impact
On a bad day, five teachers tell parents five different things — A drill with roles and one voice to parents
Pupils forget the yearly assembly within weeks — Ten-minute activities in many subjects, every term

Each fix answers the cause: people follow rules they can read and helped write, scores beat fear, rehearsed roles beat confusion, and repeated practice beats one talk.

7 **In a drill, the communications lead is the only voice to parents, the record keeper writes down times and decisions, and the drill tests the plan, not the people.**

One voice keeps parents' information clear; the incident lead decides but doesn't speak to parents.

8 **Simple habits for young pupils, deeper skills each year after**

A spiral comes back to the same ideas every year with more depth, like road safety.

9 **False**

Paying a blackmailer brings more demands, not an end.

10 **Write down three lessons; Turn each lesson into a change with an owner and a date; Update the contact card and the policy**

A drill pays off only through the changes it leads to.
