A cyber-safe school: review

Cyber security · Level 4 · Unit check

In this unit

- A one-page cyber safety policy
- Risk assessment: what could go wrong?
- Incident drills: practise before it happens
- Teaching cyber safety across the school

The big ideas

- Rules people read, follow and sign
- Likelihood × impact: fix the likely and serious first
- Rehearse the bad day on a quiet one
- Little and often, in every subject, matched to age

Gallery walk: our school's next three steps

1. Warm-up (5 min): Each person names one change made since the unit began.
2. Gallery (10 min): Walk past the policy, the risk register, the drill notes and the term plan.
3. Gaps (10 min): Mark one gap on each with a sticky note.
4. Plan (10 min): Choose the three most important gaps and give each an owner and a date.
5. Wrap-up (5 min): Read the three steps aloud and agree when to check them.

Bring the four pieces of work from the unit and pin them up before the meeting. Prepare sticky notes or paper slips and tape.

Let’s discuss

1. What has changed in our school since this unit began?
2. Which risk still has no owner?
3. How will pupils and parents notice the difference?

Exit ticket

- The one step I own, and its date.
