Lesson notes · for you

2. Starter

Screenshots and the exact clicks

Time	Materials
45 min	A computer with a browser; Your GitHub account (and Docker Desktop, or Codespaces) Starter: https://github.com/darsi-org/cyber-capstone

Learning goals

- Make your own copy of the starter on GitHub
- Open it in Codespaces or on your computer, with Docker
- Start the practice app and install what the project needs
- See check.py write darsi-check.json

Activity: Do this

1. GitHub account if needed
2. Use this template → your repo
3. Codespaces, or Docker Desktop on your computer
4. docker compose up -d, venv, pip, python check.py

Discussion

- Did check.py write darsi-check.json?
- Do I have my repo URL?

Check yourself

- One sentence: what this stage asked me to understand or do.

Try it this week

Run python check.py once on your copy and open darsi-check.json.
