2. Starter

Screenshots and the exact clicks

You will

- Make your own copy of the starter on GitHub
- Open it in Codespaces or on your computer, with Docker
- Start the practice app and install what the project needs
- See check.py write darsi-check.json

Do this

1. GitHub account if needed
2. Use this template → your repo
3. Codespaces, or Docker Desktop on your computer
4. docker compose up -d, venv, pip, python check.py

Check yourself

1. Did check.py write darsi-check.json?
2. Do I have my repo URL?

Before you go

- One sentence: what this stage asked me to understand or do.
