Lesson notes · for you

When something goes wrong

Cyber security · Level 1 · Lesson 4

Time	Materials
15 min	Paper and a pen; A phone, with a parent or guardian

Learning goals

- Recognise the signs of a hacked account.
- Take the recovery steps in order.
- Act fast after a scam, and keep evidence.
- Tell a trusted adult, and help a friend who was tricked.

Activity: What would you do?

1. Read (3 min): Read the four problem cards: a hacked chat account, money sent to a fake shop, a password changed by a thief, and a stranger offering to recover money for a fee.
2. Order (5 min): For each card, write the first three things you would do, in order.
3. Compare (4 min): Compare with a partner. Where your orders differ, agree on the best one and say why.
4. Plan (3 min): Write the name of the adult you would tell first, and one thing that would make it easier to tell them.

Use made-up names on the cards, and never real passwords or account numbers.

Discussion

- Why is telling an adult the first step?
- Why must the helpline number come from the official app or card?
- How can you help a friend who was tricked?

Check yourself

- My first three steps if I am hacked.

Try it this week

With someone at home, write a short plan on paper: who you would tell, where the recovery settings are in your main apps, and the official helpline number of your family's bank or mobile money company. Keep it somewhere easy to find.

Worksheet

When something goes wrong

Cyber security · Level 1 · Lesson 4

Name _____ Class _____ Date _____

1 **Your friend paid for fake game coins. A stranger offers to get the money back for a small fee. What should your friend do?**

- ◯ Pay half now and half when the money comes back
- ◯ Pay the small fee
- ◯ Say no: tell a parent and report it

2 **Someone has got into your chat account. Put the steps in the best order.**

- ☐ Turn on two-step sign-in and sign out of other devices
- ☐ Tell a trusted adult
- ☐ Warn your friends and report the account
- ☐ Change the password, and anywhere you reused it

3 **If you were tricked by a scam, it's better to keep quiet so you don't get into trouble.**

- ◯ True
- ◯ False

4 **Which of these are signs that someone else may be using your account? Choose all that apply.**

- ☐ An alert about a sign-in from a phone you don't own
- ☐ The app shows you a new feature after an update
- ☐ Friends get messages from you that you didn't send
- ☐ Your password suddenly stops working
- ☐ Your battery runs low after a long game

5 **Match each problem to the first thing to do.**

You typed your password on a fake page	• • • •	Use "Forgot password" or the official help page
You sent money to a scammer	• • • •	Change it at once, and anywhere you reused it
A thief changed your password	• • • •	Say no: it's a second scam
A stranger offers to recover your money for a fee	• • • •	With an adult, call the official number of the payment company

✎ **Who would you tell first if one of your accounts was hacked or you were scammed? What would make it easier to tell them?**

Check your answers

When something goes wrong

Cyber security · Level 1 · Lesson 4

1 **Say no: tell a parent and report it**

People who charge to recover money are running a second scam aimed at people who were just tricked — paying any part of it only loses more.

2 **Top to bottom: 3, 1, 4, 2**

An adult helps you act fast and calmly. Changing the password shuts the thief out; two-step sign-in and signing out other devices stop them coming back; warning friends stops the scam spreading.

3 **False**

Keeping quiet gives the scammer more time and keeps you from help.

4 **Friends get messages from you that you didn't send; An alert about a sign-in from a phone you don't own; Your password suddenly stops working**

Messages you didn't send, sign-ins from devices you don't own and a password that suddenly fails all point to someone else in your account.

5 **You typed your password on a fake page — Change it at once, and anywhere you reused it**
You sent money to a scammer — With an adult, call the official number of the payment company
A thief changed your password — Use "Forgot password" or the official help page
A stranger offers to recover your money for a fee — Say no: it's a second scam

Each problem has its own first move, and every one of them goes faster when you also tell a trusted adult.
