Your digital footprint: review

Cyber security · Level 2 · Unit check

In this unit

- Every post leaves a trace
- Who knows where you are?
- Share with care
- Who else is watching?

The big ideas

- Everything leaves a trace, and details add up
- Allow only what an app needs; share location with care
- Ask, pause and check before you share
- Networks, trackers and free apps see more than you think

Activity: Footprint makeover

1. Warm-up (3 min): Recall one habit from each lesson.
2. Plan (7 min): Write a made-up profile with five risky details.
3. Fix (7 min): Swap with a partner and make it safe.
4. Share (3 min): Explain your three best fixes.

Use only made-up names and details. The profile is a game, not anyone you know.

Let’s discuss

1. Which habit from this unit will you keep?
2. What surprised you most about who can see your data?
3. How would you explain your footprint to a younger student?

Exit ticket

- My most useful habit from this unit + when I’ll use it.
