Review notes · for you

Collect and sort: unit check

Data engineering · Level 1 · Unit check

Time	Materials
25 min	Paper and a pen. No device needed.

Learning goals

- Ask, count, tally
- Sort it into a table
- Draw it: charts
- Data about you

Activity: Team quiz

1. Teams (2 min): Make teams of four and give each team a sheet of paper for its answers.
2. Quiz (15 min): Read each question aloud; each team agrees on one answer and writes it down.
3. Explain (8 min): Reveal each answer and ask one team to explain why it's right.

Discussion

- Which question would you like to ask next?
- What makes a chart fair?
- Who could you ask before sharing your details?

Check yourself

- One thing I learned about data, and one thing I'll keep private.

Try it this week

Ask your family one question, make a tally, draw a fair bar chart, and keep everyone's private details off it.

Quiz sheet

Collect and sort: unit check

Data engineering · Level 1 · Unit check

Name _____ Class _____ Date _____

1 **What is data?**

◯ Facts we collect to answer a question ◯ Only numbers on a computer ◯ Pictures we draw

2 **Tally marks are counted in groups of five.**

◯ True ◯ False

3 **Match each tally to its number.**

One group of five and one line	• • • •	12
Two groups of five and two lines	• • • •	3
Three lines	• • • •	6

4 **In a table of the days of the week, what does one row show?**

◯ One day ◯ One heading ◯ The whole week

5 **Which of these make a good table? Choose all that apply.**

☐ One fact in each cell ☐ A heading on every column ☐ A Total row in the middle

6 **Put the steps in order, from a question to a chart.**

☐ Tally the answers

☐ Draw a bar chart from zero

☐ Ask a question

☐ Count them

7 **In a pictogram, one picture means two pupils. There are three pictures. How many pupils?**

◯ 6 ◯ 3 ◯ 5

8 **A fair bar chart starts its bars at zero.**

◯ True ◯ False

9 **Complete the sentence.**

Your home address and your passwords stay _____ .

Word bank: fine · shared · private

10 **An app asks for your phone number to give you a prize. What do you do?**

◯ Type a friend's number instead ◯ Stop, and ask a trusted adult ◯ Type it in quickly

Check your answers

Collect and sort: unit check

Data engineering · Level 1 · Unit check

1 **Facts we collect to answer a question**

Data is facts we collect to answer a question.

2 **True**

Four lines and a fifth across them make a group of five, so you count in fives.

3 **One group of five and one line — 6**
Two groups of five and two lines — 12
Three lines — 3

Count each group as five, then add the lines left over.

4 **One day**

Each row is one thing, here one day. Each column is one fact about it.

5 **A heading on every column; One fact in each cell**

Headings and one fact per cell help everyone, and the computer, read the table.

6 **Top to bottom: 2, 4, 1, 3**

Question, tally, count, then chart: each step uses the one before it.

7 **6**

Three pictures, two pupils each: two, four, six.

8 **True**

Bars from zero show the real differences.

9 **Your home address and your passwords stay private.**

Your address tells people where you live, and passwords open your things, so both stay private.

10 **Stop, and ask a trusted adult**

Stop and ask first. A prize that wants your details is often a trick, and your friend's number is private too.
