Lesson notes · for you

1. Project description

Why, what, hours, starter link

Time
15 min

Materials
A browser (phone or computer); An email you can open, for your GitHub account
Starter: https://github.com/darsi-org/data-science-capstone

Learning goals

- Know why this capstone exists
- Plan about 16 hours across five milestones
- Find the starter template link
- Next: set up the starter, with screenshots

Activity: Do this

1. Read the project map: why, what you build, the hours
2. Put the five milestones in your calendar, about 16 hours in all
3. Check you have a computer and the accounts on the Starter list
4. Then open 2. Starter

Discussion

- Can I explain why this stage exists?
- What do I open next?

Check yourself

- One sentence: what this stage asked me to understand or do.
