Designing a data-science module

Data science · University · Lecture 4

In this lecture

- Align outcomes and assessment.
- Design a staged, real project.
- Write a rubric that teaches.

Remember

- Assess the verbs you teach.
- Real data, real questions.
- One command reruns it all.

Align a module

1. Warm-up (5 min): What does your exam reward?
2. Teach (10 min): Alignment and GAISE.
3. Map (20 min): Outcomes to tasks.
4. Draft (20 min): A rubric.
5. Wrap-up (5 min): One-minute paper.

Let’s discuss

1. Which outcome has no assessment?
2. How will you check reproducibility at scale?
3. What feedback will the draft get?

Exit ticket

- Write one outcome with an active verb and the task that assesses it.
