Data and automation: review

IoT · Level 3 · Unit check

In this unit

- Logging data you can trust
- IF/THEN: rules that act
- Power: batteries and the sun
- Networks: getting the data home

The big ideas

- Trust data you've checked, and clean it openly
- IF/THEN rules need two thresholds and a safe failure
- Sending drains the battery; the sun can refill it
- Choose the network from distance, power, data and cost

Team quiz

1. Make teams of four
2. Read each question aloud; teams agree on one answer
3. Reveal the answer and ask one team to explain why
4. Write the hardest question on the board for tomorrow

Let’s discuss

1. Which idea will you use first?
2. Which question surprised you, and why?
3. What will your pupils build or measure first?

Exit ticket

- One idea I will use, and when I will use it
