IoT protocols: MQTT, CoAP and LoRa

IoT · University · Lecture 3

In this lecture

- Explain publish/subscribe.
- Choose MQTT, CoAP and a QoS.
- Trade range against rate.

Remember

- Pub/sub decouples devices.
- Lowest safe QoS.
- LoRa: far but slow.

A broker in the room

1. Warm-up (5 min): Which network?
2. Set up (10 min): A broker.
3. Publish (20 min): Team topics.
4. Choose (20 min): A brief.
5. Wrap-up (5 min): One-minute paper.

Let’s discuss

1. When would you pay for QoS 2?
2. What breaks if the broker fails?
3. Which brief was hardest, and why?

Exit ticket

- Choose a link and QoS for a smoke alarm in a flat, and justify it.
