Heuristics and simulated annealing

Optimization · University · Lecture 3

In this lecture

- Use local search.
- Explain annealing.
- Evaluate heuristics.

Remember

- Local optima trap.
- Accept some worse moves.
- Many seeds, a bound.

Every row a seed

1. Warm-up (5 min): Exact or fast?
2. Search (15 min): Local.
3. Anneal (20 min): Seeds.
4. Evaluate (15 min): Spread.
5. Wrap-up (5 min): One-minute paper.

Let’s discuss

1. How wide was the spread?
2. What did cooling faster do?
3. How will you require evaluation?

Exit ticket

- Write the evaluation rule you will require for heuristics.
