Evaluating models and assessing students

AI · University · Lecture 4

In this lecture

- Evaluate without leakage.
- Report beyond accuracy.
- Assess learning when LLMs are allowed.

Remember

- Open the test set once.
- Disaggregate metrics.
- Assess reasoning, not output.

Audit a project

1. Warm-up (5 min): Who really won?
2. Teach (10 min): Splits and metrics.
3. Audit (20 min): A flawed project.
4. Redesign (20 min): The assessment.
5. Wrap-up (5 min): One-minute paper.

Let’s discuss

1. What leak did you find?
2. Which metric would you require?
3. What is your policy on LLM use?

Exit ticket

- Write one oral-defence question for your next ML project.
